Dear Sir or Madam

I have recently undertaken the development of a clinic that will provide, Non Surgical Cosmetic Procedures, Holistic Relaxation & Beauty Therapies & Light & Photo Skin Therapies.

Working within a pre - established building occupied by other businesses the most important aspects of the provision of the services has been reliability, adaptability & confidentiality.

It has been of considerable help that the staff of 'All in One' have also appreciated many aspects of Health & Safety & the provision of their services safely & within an active public environment.

I had undertaken considerable preparation with regard to my registration with the Care Quality Commission & appreciated dealing with a company that I was able to turn to for support & advice. Particularly in the areas of disability access, water provision & temperature control & the day to day ergonomics of providing my skills within the public domain.

I could only pass on my recommendation to any prospective employer & provide my contact details should you wish to discuss any aspect of my project or this recommendation.

Dr C. N. Burke.

Clinical Lead & Director - Bodysciences Plc.
